

SEASONAL CHECKLIST
BIRDS OF GREATER
VANCOUVER, BC

Rev. August/2013

AREA COVERED

Greater Vancouver from the International Boundary (including Point Roberts, WA) North to 49° 35' N West to the eastern shoreline of Howe Sound (including Bowen Island) and to the middle of the Strait of Georgia. East to 122° 33' W (260th St. in Langley and Maple Ridge) including all of Golden Ears Provincial Park.

THE CHECKLIST

This checklist is divided into two parts: a list of 267 regularly occurring species (reported annually), and a list of 140 casual and accidental species (not reported every year).

For the regular species we present bar graphs indicating the seasonal occurrence and relative abundance of each. For the casual and accidental species because not all sightings have been critically reviewed, we cannot say exactly how many sightings there are for each. Therefore we have indicated for each season whether the species is accidental (1 or 2 records) or casual (3 or more records), without indicating dates for individual sightings.

Checklist Committee: Wayne Weber (chair), Brian Self,
Larry Cowan & Jude Grass

Original Computer design by Tom Brown, Kyle Elliott & Rick Toochin. Modified 2013 by Larry Cowan.

Cover drawing of Black-throated Gray Warbler by Mark Wynja.
Back cover drawing of Crested Myna by Glenn R. Ryder.

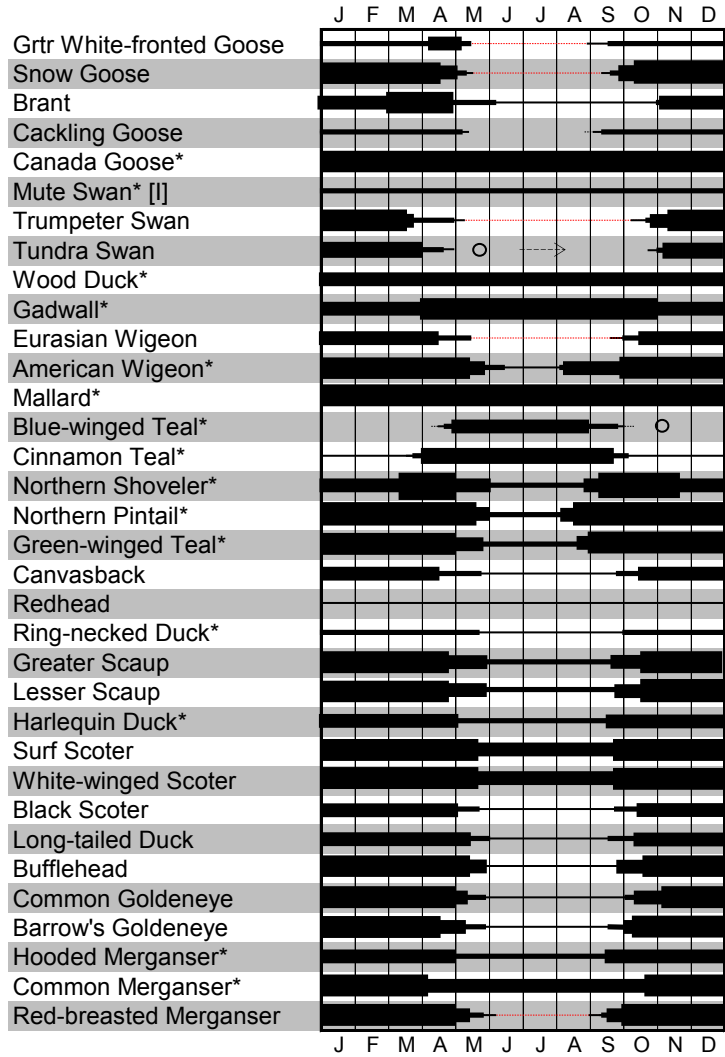

REPORTING RARE BIRDS

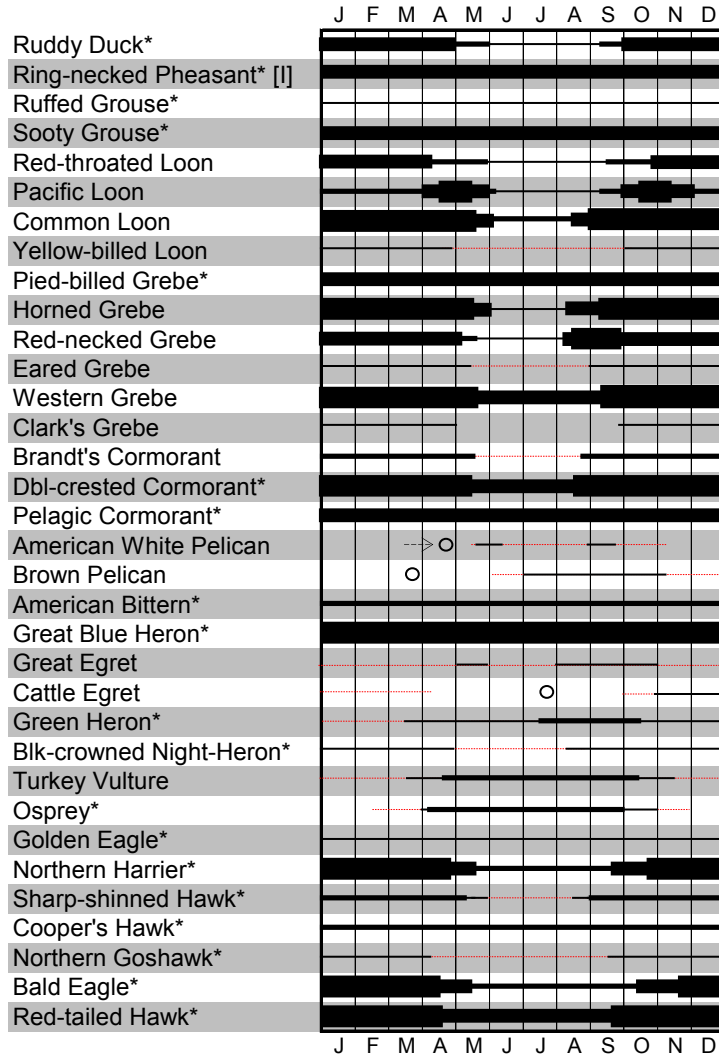

Please report sightings promptly of accidental, casual or out of season species to the **Vancouver Rare Bird Alert**. 604-737-3074

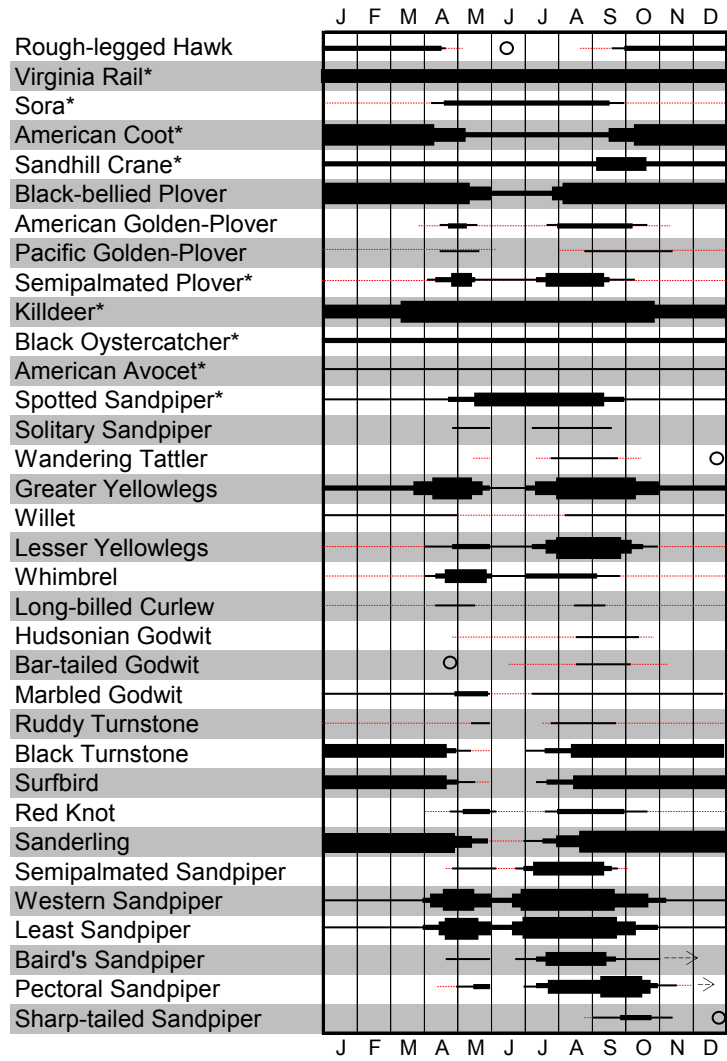

We request that observers document such sightings by completing a **Rare Bird Report Form** available on the Nature Vancouver website at http://www.naturevancouver.ca/Main_Birding

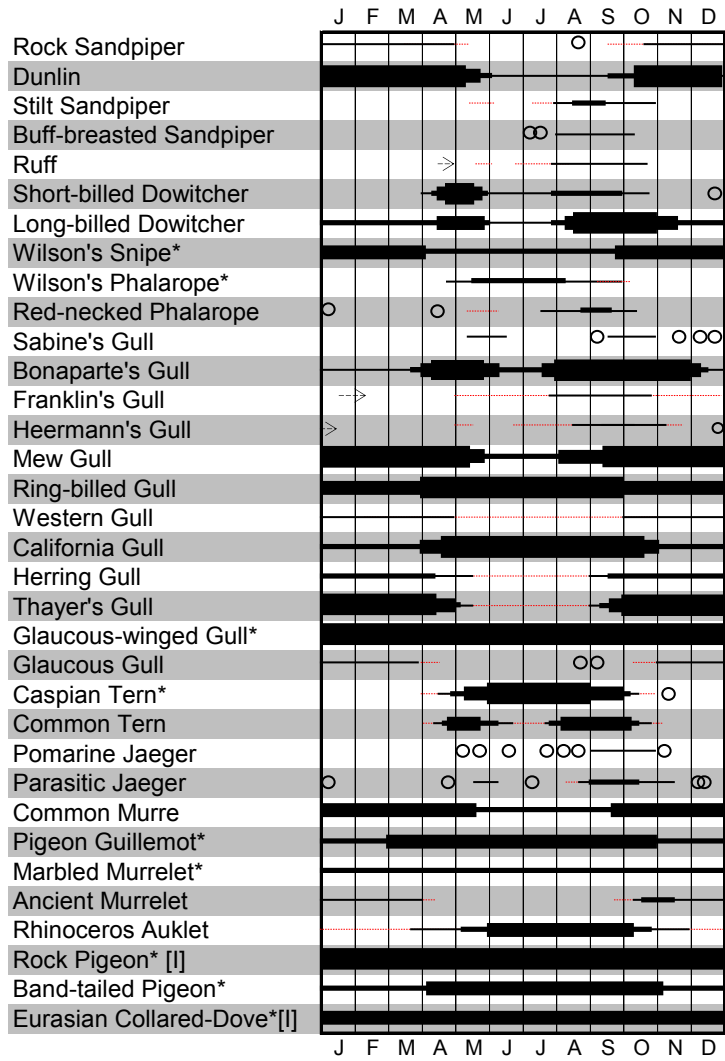

Observers are also encouraged to report their sightings, rare, or otherwise to "eBird" (<http://ebird.org>). Photos of rare birds can be "embedded" in a list submitted to eBird.

Key:	
██████████	Common: 25+ seen or heard daily
██████████	Fairly common: 5-25 seen or heard daily
██████████	Uncommon: 0-5 seen or heard daily
—————	Rare: 1-10 records per year
.....	Casual: 2-20+ records; on average not seen every year; somewhat out of normal range.
○	Accidental: single record; usually far outside normal range (1-4 days stay)
----->	Accidental: duration of stay (5+ days stay)
[I]	Introduced: species established for more than 10 years with an historically stable population.

Extirpated [I - introduced]

California Quail* [I] Gray Partridge*[I]
 Yellow-billed Cuckoo Crested Myna* [I]

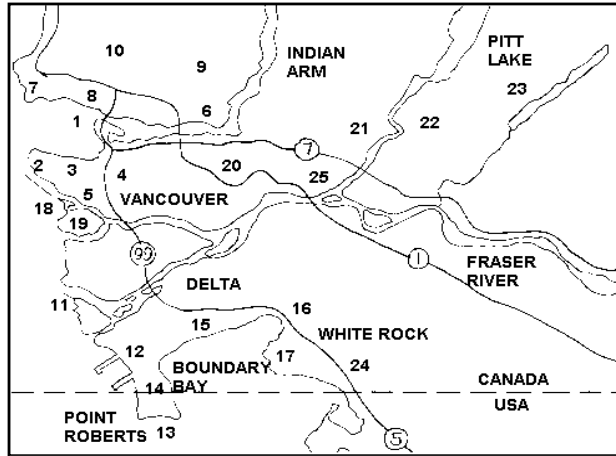

Undocumented Species

The following species have been listed on previous editions of the Vancouver Checklist, but we have been unable to find convincing documentation for their occurrence.

Black Duck Laysan Albatross
 Short-tailed Shearwater Black-vented Shearwater
 Magnificent Frigatebird Tufted Puffin
 Mountain Plover Little Curlew
 Golden-winged Warbler Virginia's Warbler

Undocumented Species (cont.)

Blackburnian Warbler Mourning Warbler
Le Conte's Sparrow
